

MOONLIGHT⁺

"Incubating Light"

Urban Furniture by Moonlight

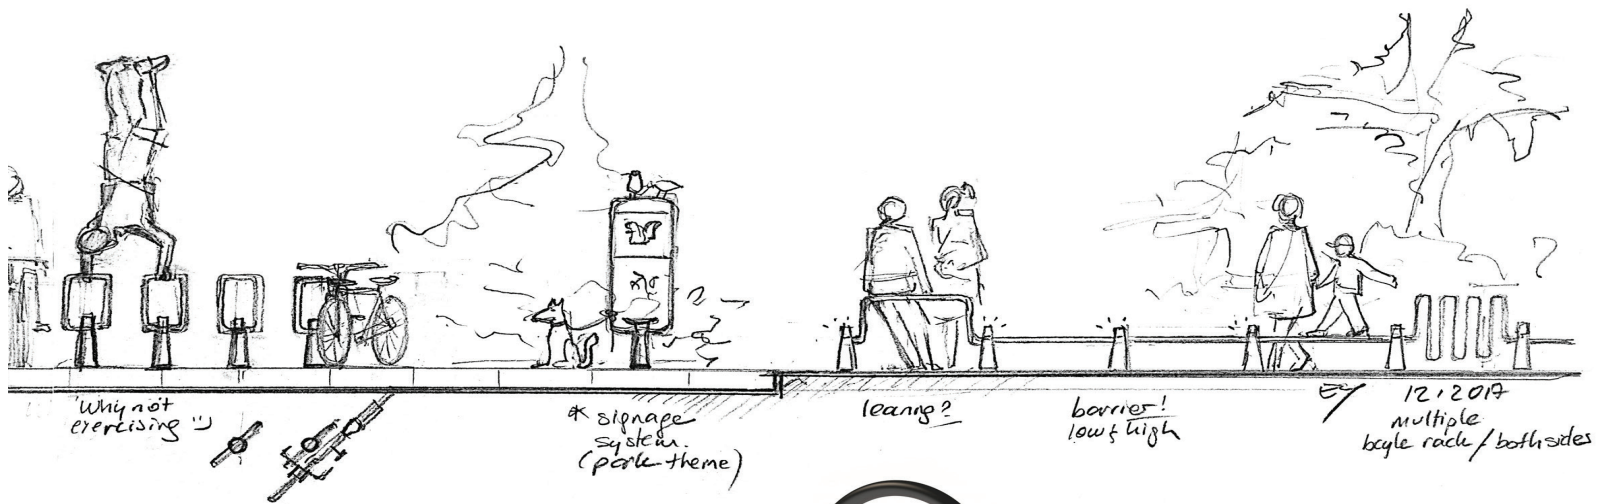

Kuka Collection

A modern interpretation of urban furniture,
by Moonlight to improve quality of life around the clock.

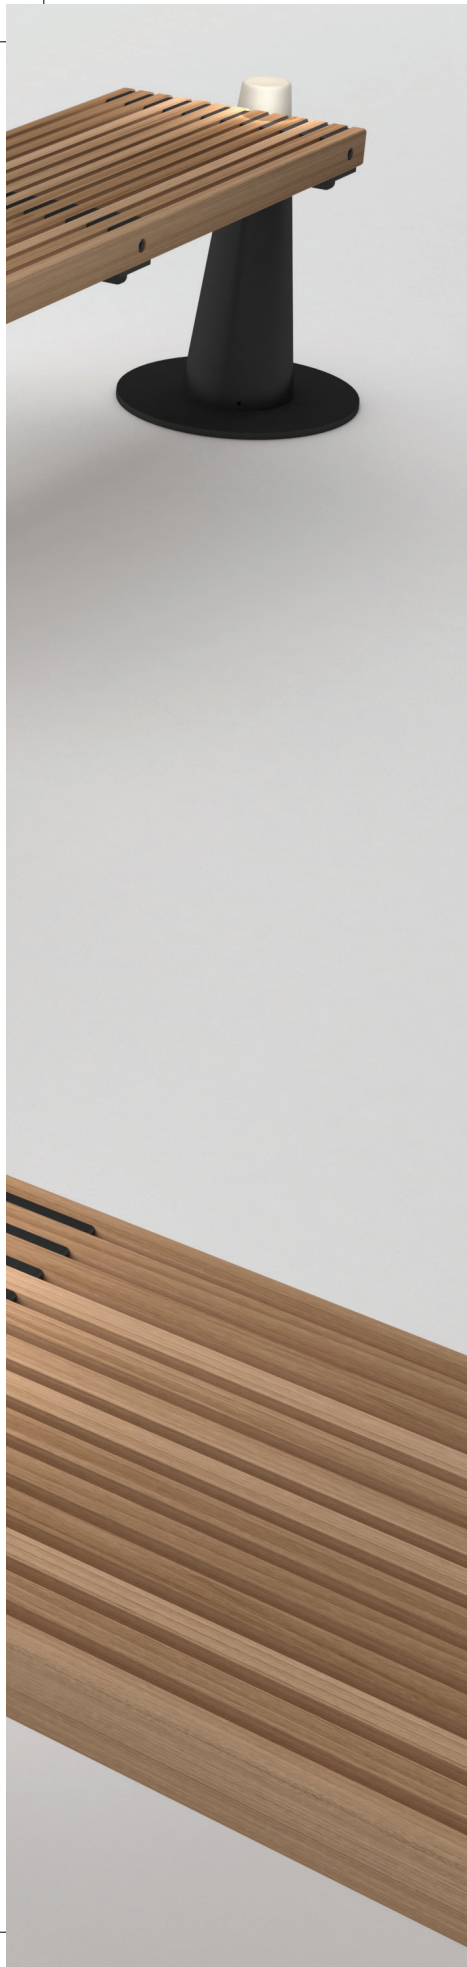

Aim

KUKA, with its cone shape body module, mimics traffic cones saying:
'STOP and THINK' about your hectic, unstoppable city life which is
made up of constant shuttling between home, work, school,
shopping centers, etc...

The shape has a reputed language as an organizer of the traffic.
KUKA is designed as a street furniture yet this time to **organize**
pavements, sidewalks, parks for pedestrians and cyclers.

Design Language

The simple geometrical, toylike form aims a friendly language to welcome people and **spend some time around KUKA** in the public areas, parks, residential complexes, school campuses, etc...

Graphic language of simple geometry of KUKA Bike Rack makes them noticable in the crowd, during rush hours of the city. This simplicity in form lets bright colors go well with the shape accentuating visibility and more over turn the repititive use of products into lively visual festivity.

They are stationary but the cone shape makes them look like you can replace them any moment, which give them a dynamic look.

Modularity

The cones also serve as legs creating bench versions such as individual or continious seatings of the product family. The same structure offers different floor anchorage options for different floor finishes, more accessories such as optional tables, integrated charging units for our daily use devices.

Light integration proposes a different aura for users and a safer resting experience for public spaces especially at nights.

New Generation Lifestyle

Kuka product family puts forward modular solutions for urban people. KUKA body module may also offer integrated electrical outlet for recharging e-bikes or any other device to be charged out on the street. Meanwhile one can sit and wait for the process on Kuka Benches that can also be combined with bike racks.

Modularity supported by its structure leads Kuka to create spaces for urban areas whether it is a crowded city center or a natural park. Illuminated tips enhances visibility and feeling of safety. Thus Kuka becomes an ideal solution for new generation lifestyle.

Kuka as an Urban Solution

One of the most differentiated aspect of KUKA is its lit acrylic TIP placed on the body module, especially designed and integrated to the cone to supply enough illumination for the locked bikes' area to create **safer surrounding**, addition to a **better vision** to ease locking and unlocking process during insufficient light in the afternoon or at dawn or at night.

KUKA Bollard is also used as sidewalk barrier. The light integration makes themselves visible at night and also illuminates the pathways around them. Different light colors that can be coded by the user, so they may communicate with the pedestrians for various purposes.

Potential of its structure lets multiple usage together with High & Low Pipe Connectors, turning them into a **continous fence** when needed.

Kuka Collection
